improving their quality. The Industrial prototypes of newly designed agricultural equipments would pave the way for the availability of quality machines and implements to the farmers. Thus, these schemes would enhance the returns from agriculture by way of optimal utilisation of agricultural inputs and facilitate timeliness and precision in farm operations.

(d) With a view to advancing agricultural production, assistance is also provided to the farmers, among others, for acquiring agricultural implements and machines under various crop-specific programmes. Further, Government's efforts have been directed towards developing efficient agricultural machines and implements; devising improved agronomic practices; dissemination of improved technology and towards imparting skills to the users of agricultural machines for their operation, maintenance and management.
